

# How to do your two times-table!

Trick: double the number to its self

Example:  $2 \times 9 = 9 + 9 = 18$

This picture has 7 pairs of wellies so we do 7 times 2.

So let's use the trick.

$2 \times 7 = 7 + 7 = 14$ .

The answer is 14.

# How to do your ten times-table!

Trick: put a zero after it

Example:  $10 \times 2 = 20$

This picture has 3 tins so we do  $3 \times 10$ .

So let's use the trick.

$10 \times 3 = 30$ .

The answer is 30.

# How to do your five times-table!

Trick: cut in half, then times ten

Example:  $5 \times 6$ : cut 6 in half to get 3, then times 10 for 30

This picture has 5 oranges in it so we do  $5 \times 5$ .

So let's use the trick.

$5 \times 5$ : cut 5 in half to get 5.2, then times 10 for 25.

So the answer is 25.
